Background

The MSLA List of Business Establishments (MSLA LBE) 2018 provides updated information from economic units whose activities are classified in all sectors of the North America Industry Classification System 2013 (NAICS Mexico).

Currently the list provides information on two types of economic units:

- The economic unit is in a single physical location, nestled in a place permanently and enclosed by buildings and fixed installations, combines actions and resources under the control of a single entity owning or controlling to perform any economic activity, whether with profit or not. It includes dwellings in which activities are carried out.
- The company organization, owned by a single legal entity that performs one or more economic activities, with autonomy in making marketing decisions, financing and investment, by having the authority and responsibility to allocate resources according to a plan or strategy of production of goods and services, can be located or operated in several locations.

The list excludes economic units carrying out activities as a street vendor or those in which the premises in which economic activity is carried out are removable and are removed daily.

Economic units that MSLA LBE included in this release are located in the 32 states; 2,457 statistical municipalities; 4,543 urban localities statistics, 11,948 rural localities and 891,904 blocks in which is situated at least one establishment.

The geostatistics key to block level and the type and name of the road complements the geographic location information. In addition, the geographical coordinates (latitude and

longitude) that allow having the approximate location of business in geostatistical mapping are provided.
